

Combi USA, January 2009

Vera Fullaway | 303.378.2932 | vfullaway@comcast.net

Combi USA announced the January 2009 launch of the Combi CARES™ Program, "Community Awareness Reaching Every State." Through the Combi CARES™ Program, CPS Advocates, Technicians and Instructors will be able to benefit from Combi's dedication to improvements in the progressive CPS industry.

The Program is a multi-faceted initiative that is intended to reach diverse groups in the Child Passenger Safety field through education and consumer assistance that will result in product enhancements. Combi USA will be participating in numerous State and regional CPS Conferences, enhancing their website, increasing consumer assistance with the Combi CARES™ Team and developing educational materials for caregivers.

"Combi appreciates the fact that Child Passenger Safety Technicians are a key component to product improvement. Through this program, we are able to acquire very valuable feedback to develop child safety products that offer ease of use, increased safety, vehicle compatibility and best fit for children" said Ed Whitaker, Director of Operations.

Vera Fullaway, CPS Instructor with 30 years of experience in injury prevention education, recently joined the Combi Team to lead the Technician education project with a high profile, high quality series of CEU sessions, communiqués and serve as the liaison between CPS Technicians and the product development team.

Combi CARES™

Community Awareness Reaching Every State

The Combi CARES™ program is a multi-faceted initiative that is intended to reach diverse groups in the Child Passenger Safety field through education and consumer assistance that will result in product enhancements.

We extend an invitation to all Child Passenger Safety Advocates, Technicians and Instructors to join us at the conferences that we will be participating in.
